#### RFI Objectif Végétal

The Plant Health and Quality Summer School is financially supported by the "RFI Végétal program" (Research - Education - Innovation program in Pays de la Loire), which is funded by the Région des Pays de la Loire, Angers Loire Métropole and the European Regional Development Fund.

Objectif Végétal, Research, Education & Innovation in Pays de la Loire is a regional program (2014-2019) established by the Pays de la Loire Regional Council and that involves the teaching and research institutions (Université d'Angers, leader of the program, Agrocampus Ouest, ESA, Inra, Université de Nantes) as well as the international French cluster Végépolys.

Objectif Végétal program mainly aims to **reinforce the visibility and attractiveness of the regional centre for education and basic research**, to boost collaborations with companies and reinforce the processes of economic valorization of research findings, and to develop international partnerships.
